

Student ID: 816043171

Name: Jerell Balroop

Access Pass Type: Standard Plus Lounge (For the regular traveller)

Q 1.

a)High level use case:

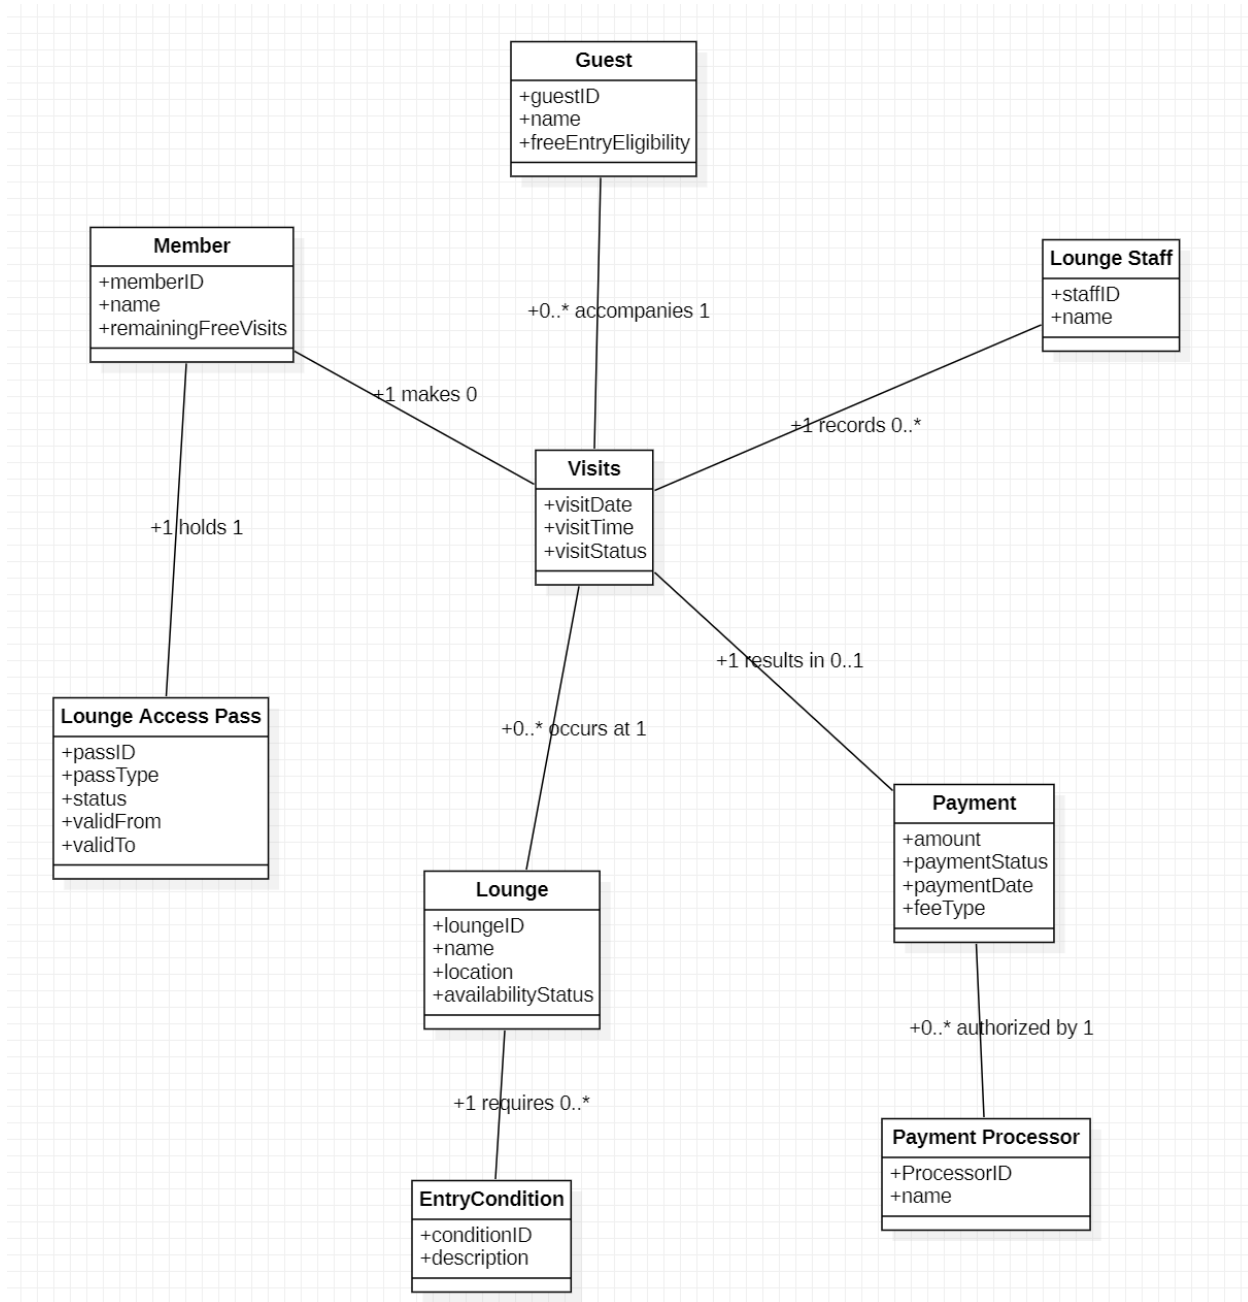

Use Case: Validate Standard Plus Lounge Access Pass

Actors: Member, Lounge Staff, Guest

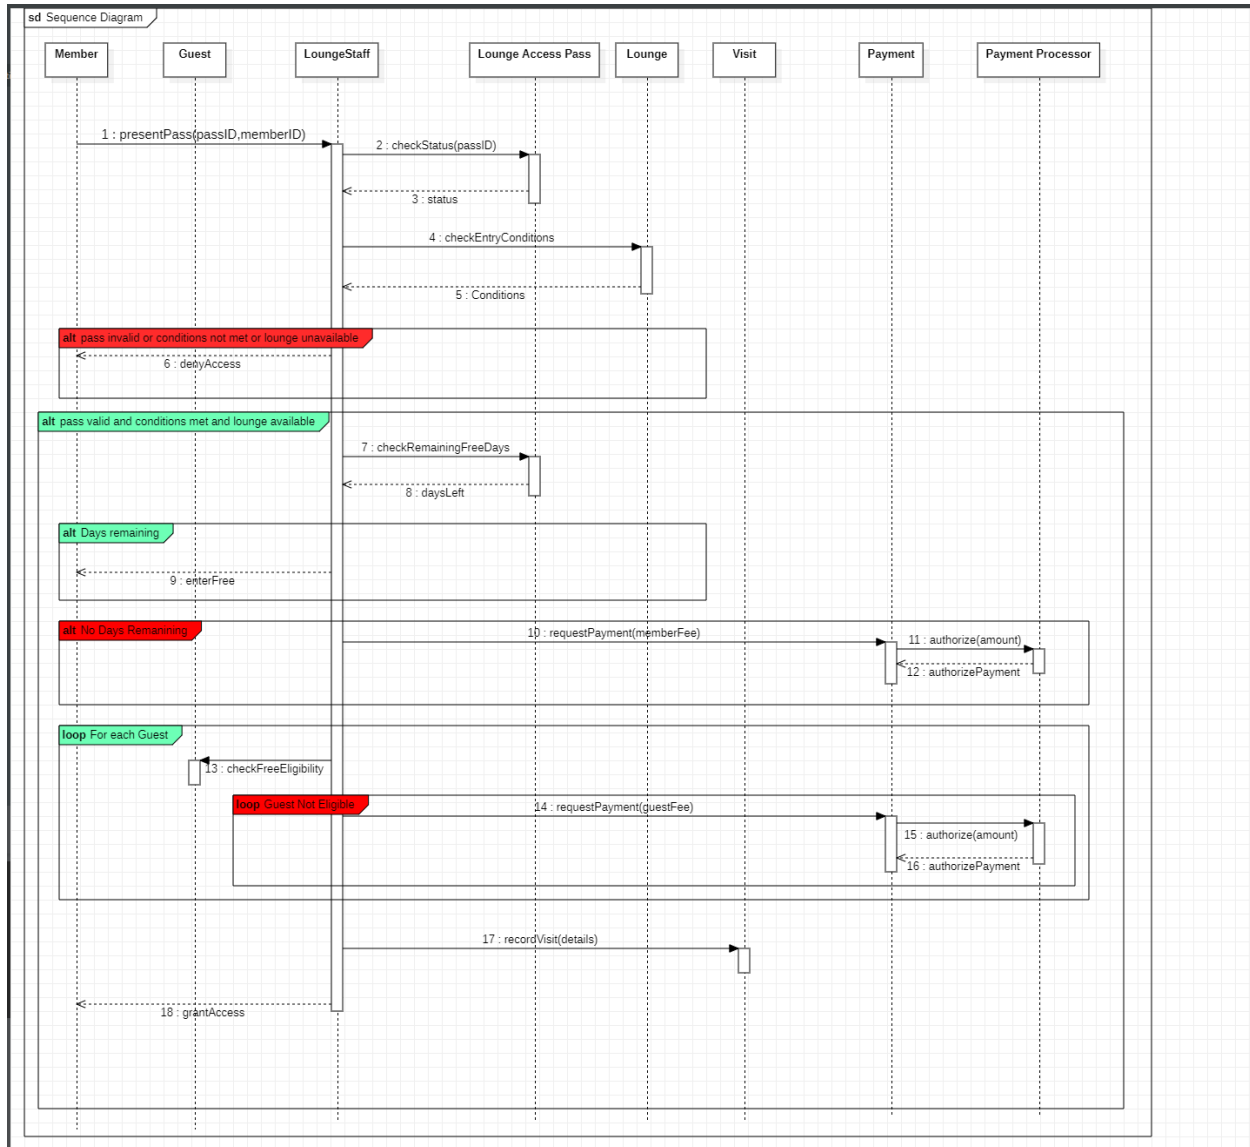

Type: primary

Description: A Member arrives at an airport lounge with one or more guests and presents a valid Standard Plus lounge access pass and ID to the Lounge Staff. The Lounge Staff records the pass details. The system verifies that the pass is active and that the Member is eligible. It checks the lounge's required entry conditions and the Member's remaining free visits. If free visits remain, the Member enters free, otherwise the Member pays the Standard Plus member visit fee. Each guest pays the guest visit fee unless the guest qualifies for free entry. If payment is required, the Payment Processor authorizes it. The system records the visit, and the Lounge Staff grants access. If the pass is invalid, the Member is ineligible, or the lounge is unavailable, access is denied.
